

To whom it may concern,

It is with great enthusiasm that I write this letter of recommendation on behalf of a great company, Sweet Logic. Established in 2018 and based in Arvada, Colorado, Sweet Logic specializes in creating healthy dessert options.

Sweet Logic was founded with intention to master tasty, low-sugar, low- carb and gluten free sweets that are gut healthy while still satisfying sugar cravings! It started with handcrafting a healthy mug cake recipe in the owner's home-kitchen and has now become internationally recognized. Today, it offers a variety of products, including mini cookies, full-size dessert mixes, gluten-free options, and more.

Sweet Logic prides itself on providing convenient solutions for individuals seeking healthier alternatives while satisfying their cravings. The entire team is dedicated to creating tasty but healthy dessert options while also aiming to be a driving force in healthy snacks. Their mission is to help create easy and dependable options for people to have a no stress dessert while still feeling good about what is in each bite!

I wholeheartedly recommend Sweet Logic to anyone looking for tasty and health focused sweets that are enjoyable in the moment and can still benefit you in the long run. Its great team goes above and beyond to provide quality snack choices, providing a healthier option so you can live the sweet life.

Sincerely,

Matt Nagy
