

To whom it may concern,

It is with great pleasure that I write this letter of recommendation today on behalf of a fantastic company, Waterford Tank & Fabrication. Founded in 2006, Waterford Tank & Fabrication is an industry leader in storage tank and pressure vessel fabrication, serving clients across the Midwest and Eastern United States.

Waterford Tank & Fabrication can meet a variety of client specifications and industry codes. Its state-of-the-art lean manufacturing systems build quality into the design of each tank and pressure vessel, and its facility produces a wide variety of options, from single and double-wall steel tanks to knockout drums and more.

Facilities and products aside, it's the team at Waterford Tank & Fabrication that makes the biggest difference. From intake to delivery, each member is professional and highly experienced, treating every order with utmost care and diligence. At Waterford Tank & Fabrication, you can be assured that your storage tank or vessel will be expertly designed and fabricated to meet your exact needs.

I highly recommend Waterford Tank & Fabrication to anyone that needs a supplier of custom storage tanks and vessels. Its high-quality products, skilled team, and expansive service area make them the ideal partner in the oil, gas, and propane industries.

Sincerely,

John O'Connell
