

To whom it may concern,

I am pleased to write this letter of recommendation for McCay Tool and Engineering, a distinguished manufacturer based in St. Louis, Missouri. Founded in 1950, McCay Tool and Engineering has established itself as a leader in the precision machining of aerospace components.

McCay Tool and Engineering is known for its unwavering commitment to quality and excellence and offers a comprehensive range of precision machining services tailored specifically for the aerospace industry. These services include CNC machining, complex component fabrication and assembly. The company's state-of-the-art facilities and advanced technologies enable it to produce high-precision parts that meet the rigorous standards and specifications required in aerospace applications.

At McCay Tool and Engineering, it is the team standing behind it that makes all the difference. The highly skilled engineers, machinists, and technicians bring a wealth of experience and expertise to their work, and their dedication to precision, innovation and continuous improvement ensures that each project is completed to the highest standards of quality and reliability. Their collaborative approach and attention to detail have earned them a reputation for delivering exceptional results on time and within budget.

McCay Tool and Engineering's long-standing commitment to excellence and its ability to provide top-tier machining solutions make it an invaluable partner in the aerospace industry. I highly recommend its services and team to anyone looking for outstanding value and superior performance in the aerospace industry.

Sincerely,

Rod Holter
