

To Whom It May Concern,

100% Chiropractic located in Castle Rock, Co is a full-service wellness clinic that offers cutting edge chiropractic care, massage therapy, and a full line of the highest quality nutritional supplements.

I discovered Schooley Mitchell through a social media advertisement. I found the concept interesting. I'm also interested in saving money, since costs are skyrocketing all around us. Keith Crockett, who is also in Castle Rock, met with me. Keith wanted to learn more about 100% Chiropractic, our goals and discussed some areas where we could see savings. I thought about it and decided to move forward as there was only an upside and no risk. We decided to look at a few different areas but could only focus on one since we are a franchise and some of the areas are dictated by head office.

Keith and his team came back with a great report for savings on compressed gases by switching vendors. The contract had a few things that we did not like, but Schooley Mitchell stepped up and helped us work through those.

We are very happy that the price for our compressed gases is less than half of what we were paying before. Other benefits include that the price will stay at these rates for 3 years and we get priority for our cylinders to be filled. Keith even took back the old cylinders to our prior vendor.

I'm happy I took the next step with the social media advertisement, and I would suggest reaching out to Keith with Schooley Mitchell and getting a complimentary analysis of your operating costs.

Sincerely,

A handwritten signature in dark ink, appearing to read "Patrick Merchant", with a stylized flourish at the end.
